Dear [Redacted]

We have completed our review of the enclosed, four, mid-1945, secure, teletype messages between the Joint Intelligence Center, Pacific Ocean Area and the Advanced Headquarters of Commander in Chief, Pacific as requested in your letter of 17 September 1985. We find that the passages pertaining to OSS operations do not reveal or identify any specific intelligence activity, source or method, and we therefore have no objection to this information being declassified and released.

Sincerely,

[Redacted]
Chief, External Branch
Classification Review Division
Office of Information Services
Directorate of Administration

Dear [Redacted]

Enclosed you will find five pages which are part of a file that we intend to release to the National Archives and Records Administration. The contents of the file, which was discovered in the records of the Joint Intelligence Center, Pacific Ocean Areas, consist of record copies of secure teletype (SIGTOT) messages between that organization and the Advanced Headquarters of Commander in Chief, Pacific. The exchanges occurred during the period March - August 1945.

The portions of concern to your organization pertain to operations of the Office of Strategic Services (OSS). The pages in the file which we would like you to review are 029, 034, 216, 217 and 240. Although the individual pages are not marked as to their classification, the entire file is classified TOP SECRET overall.

This agency's declassification guidelines preclude unilateral declassification and release of any material originated by or relating to other government agencies. We would appreciate it, therefore, if you would review the enclosed documents to determine whether you concur in their declassification and release. We have highlighted those portions which we feel require your review.

If you have any questions, please contact our project officer, [Redacted] who may be reached on 688-7553 or (secure) 972-2268. Your cooperation will be greatly appreciated.

[Redacted]
Chief, T54

The enclosed four documents (5 pages) consist of mid-1945 cable exchanges between the Joint Intelligence Center, Pacific Ocean Area and the Advanced Headquarters of Commander in Chief, Pacific. The documents contain passages pertaining to OSS operations which have been highlighted for us by NSA. These passages describe Japanese military movements, morale, damage sustained, etc. and reveal nothing of intelligence activity, sources or methods. We find no reason for the documents to be withheld from the CIA point of view and recommend that CIA concur in the declassification of these documents.

C/CRD

I agree. No problem with releasing

INSTRUCTIONS

1. **UNWRAPPED** Material, form A1295 receipt will be prepared in triplicate by the originator of any unwrapped classified correspondence. (One to be retained by the originator and two copies are to be forwarded with material.)
2. **PREWRAPPED** Material, form A1295 receipt will be prepared in duplicate by the originator of any prewrapped classified correspondence. (One to be included in the first wrap and one to be retained by originator.)
3. The classification will be stamped at the top and bottom of the transmittal portion of the form in the appropriate block. Caveats should be stamped in lower classification block above perforation. Code-word information will never appear on the transmittal.
4. Add a control/receipt number to the "Control" block. Complete "From" block.
5. Number each line item.
6. Give an unclassified description of material in the "Title/Description" block and state the classification of the material in the classification block.
7. Include originating element organization designator in the "Prepared By" block at the bottom of the form. Also repeat assigned "Control/Receipt Number" on receipt portion.
8. If contractor material is involved which requires L221 control, furnish one additional copy of A1295 to L221.
9. Type complete address in "To" block.
10. Type or print name of individual preparing form and sign the "Signature" block in ink.

(Additional instructions covering marking of letters of transmittal are provided in Chapter II, para 35.b., Classification Manual 123-2.)
